

NEW!

fastscan.io™

INTRAORAL SCANNER

Connected to Glidewell. Powered by Medit.

The fastscan.io™ Intraoral Scanner is the perfect solution for dentists seeking an affordable, straightforward path to digital dentistry with direct support from Glidewell. This high-speed scanner is powered by Medit and uniquely optimized for dentists to easily send their case to Glidewell, or seamlessly upload digital impressions directly to the glidewell.io™ In-Office Solution for the fabrication of same-visit BruxZir® restorations right in their office.

- fastscan.io delivers the speed, accuracy and light weight of the Medit i700 for an optimal user and patient experience.
- Available in both a wired and wireless version; can be bundled with a portable cart with laptop or computer that meets the highest recommended specifications for the best out-of-box experience.
- No monthly subscription or licensing fees; backed by manufacturer-direct support and training from Glidewell.
- Scanner users can enjoy access to a suite of preinstalled, proprietary Medit software and popular apps such as Medit Ortho Simulation, Face Scan, and more.

“

At Glidewell we strive to make new technology easy for clinicians to adopt by delivering products that are user-friendly, affordably priced and backed by manufacturer-direct support. In Medit we found a team of people who share our core values and dedication to improving the lives of dentists and their patients through digital innovations that streamline the restorative workflow.

– Robert Brenneise, vice president of CAD/CAM sales at Glidewell
