

## Step-by-Step Restorative Protocol

### THIRD APPOINTMENT

Try in the Wax Setup [glidewell.dental/bip-setup](http://glidewell.dental/bip-setup)

**NOTE:** Before approving the wax setup and moving on to Fourth Appointment, make sure the esthetics and occlusion are 100% correct and verified. Two provisionals implant prostheses are included with the complete service; any additional provisionals will incur a fee of \$330 each.

#### RESET APPOINTMENT (If necessary)

Try in the Reset Wax Setup (if necessary)

- Try in reset wax setup according to Third Appointment instructions.
- Return the wax setup and list any adjustments on the Rx.

- If the patient is wearing a denture, remove the multi-unit abutment temporary healing caps. If the patient is wearing a fixed provisional, remove the prosthesis and reinsert the multi-unit abutments.

- Attach the wax setup directly to the multi-unit abutments with the enclosed prosthetic screws.

- Confirm that the wax setup seats passively. Take a radiograph to confirm that the cylinders are fully seated.

# THIRD APPOINTMENT

Try in the Wax Setup

- Review checklist, making sure to complete each item. Make adjustments to the wax rim as necessary.

<input type="checkbox"/>	Midline
<input type="checkbox"/>	Incisal Edge Position
<input type="checkbox"/>	Lip Support
<input type="checkbox"/>	Smile Line/Occlusal Plane
<input type="checkbox"/>	Vertical Dimension of Occlusion
<input type="checkbox"/>	Phonetics
<input type="checkbox"/>	Clinical Smile Photo
<input type="checkbox"/>	Bite Registration (If Needed)

- Verify the midline.

- Verify incisal edge position and lip support.

# THIRD APPOINTMENT

Try in the Wax Setup

- Verify the occlusal plane.

- Verify the vertical dimension of occlusion (VDO).

- Verify the patient's bite and take a new bite registration if necessary.

**NOTE:** *If the bite is incorrect, grind or remove setup teeth to achieve an accurate bite.*

- Take clinical photos of the smile.

# THIRD APPOINTMENT

Try in the Wax Setup

**NOTE:** Before approving the wax setup and moving on to the Fourth Appointment, make sure the esthetics and occlusion are 100% correct and verified. Two provisionals implant prostheses are included with the complete service; any additional provisionals will incur a fee of \$330 each.

- Remove the wax rim and bite registration. If the patient is wearing a denture, leave the multi-unit abutments in place, cover them with the enclosed temporary healing caps and relieve the intaglio surface of the denture to seat over the multi-unit abutments.

*If the patient is wearing a fixed provisional, remove the multi-unit abutments and return them to their original positions on the master cast.*

- Select the gingival shade.

*To purchase a BruxZir® Gingival Shade Guide, call Glidewell Direct at 888-303-3975 or visit [glidewelldirect.com](http://glidewelldirect.com)*

- Return the wax setup and list any adjustments on the Rx.

**Have questions? Call 866-861-7955 or check out our how-to videos below.**
