Before

After

This patient presented with failing direct composite restorations on teeth #30 and #31. A CAMouflage® NOW A1 overlay on tooth #30 and MOBL onlay on tooth #31, provided a minimally invasive single-visit solution.

“CAMouflage NOW is an excellent restorative alternative for indirect dentistry. I can provide high-quality conservative restorations to my patients in a matter of minutes. This, in turn, has increased the productivity of my practice.”

– Chad Duplantis, DDS | Fort Worth, TX
